TRUST IS EARNED

LV Equipment BV

(LV), a Dutch based wholesale company, supplies products to end users from military & police entities. Distribution is made to NATO, government bodies direct, or through commercial accounts in the EC. LV was founded in 1985 as a wholesale company and has been distributing outdoor specialist gear until 2008. Over the years a number of governments have become a customer, not in the last place because of back ground and experience of its founder.

The knowledge and understanding of military & police requirements and the ongoing demand for high performing products in the field of carrying systems (rucksacks), clothing, footwear and accessories has led to the decision to change the organization in 2008, focusing solely on military & police gear.

LV has an exclusive distribution agreement with Berghaus Ltd. in the UK for the distribution of products throughout the EC. A License agreement allows LV to develop specific carrying systems for the military & police. Berghaus has almost 50 years experience with regard to rucksack making. Combined with the knowledge LV has about the needs of military & police operators, a unique platform has been created for building highly functional and extremely durable carrying systems.

Multi Mission Pack System

The Berghaus brand is synonymous with performance and protection, so when it comes to providing equipment for the military, police or security, we know what matters. The Multi Mission Pack System (MMPS) has been developed with input from experts in their field to deliver a family of packs that integrate and share modular parts. MMPS delivers the flexibility to carry any load from 10 litres up to 120 litres of kit, depending on the type of mission.

MMPS VULCAN IV BH21933-xxx

GB

With 100 litre capacity - the ideal sac for those on extended journeys where re-supply is not possible.

FEATURES

- Cyclops II back-system
- Top tension straps
- Front and back reinforced haul loops
- Two detachable MMPS side-pockets zip together to make a daysac
- Side compression straps
- Base compression straps
- Cynch straps on hipbelt
- Ice axe attachment
- Ski attachment points on side pockets
- Hip belt can be tightened by pulling two straps in a forward direction

MMPS GRAB BAG II BH21934-xxx

GB

Building on the modularity of the MMPS system, the modular Grab Bag interacts the Atlas and Crusader. By replacing the standard lid with the Grab Bag the whole Grab Bag can be quickly and easily removed to form a daysac containing your essentials in the event of an emergency or when you just need a daysac with you.

FEATURES

- MMPS compatible: bag replaces the original lid of the main pack to form backpack for emergency use
- Umbilical connector joins to the Grab Bag allowing for ease of removal of the Grab Bag in emergencies
- YKK® zip(s)
- Grab Bag fits inside main compartment for compact storage and ease of use

Special Mission Pack System

The track record Berghaus has in the field of MMPS rucksacs has led to further development of a mission specific military/police carrying system. A modular Special Mission Pack System (SMPS) has been developed to carry a variety of long distance rifles in a drag bag with a length up to 130cm. Larger rifles can be put inside a drag bag in two parts. Alternatively longer rifles can be carried in one piece, when placed direct in the envelope of the Crusader RC (rifle carrier), without using the drag bag

SMPS consists of three components, which can be used stand alone or interacting together, depending on the type of mission. SMPS delivers the flexibility to carry a long distance rifle without sacrificing space for (individual) combat equipment.

SMPS CRUSADER RC LV00046-xxx (size 2), LV00047-xxx (size 3) and LV00048-xxx (size 4)**GB**

The Crusader RC has an envelope against the center part of the back in which a long distance rifle can be placed. The complete original pack volume from Crusader 90+20 ltr. remains available to stow (individual) combat equipment.

FEATURES

- Cyclops II back system
- Envelope to store a long distance rifle or DragBag Long with rifle fitted.
- Other features same as Crusader

FABRIC:

Main Body: Armadura 1000D
Back system: Padded with frame

SMPS DRAGBAG LONG LV00049-xxx**GB**

The DragBag Long is shaped to fit in the envelope from Crusader RC. When used on its own DragBag Long can hold a 130cm long distance rifle, including mounted telescope and accessories. Larger rifles can be stowed in (two) parts, strapped to the molle attachment loops inside. DragBag Long comes with a detachable harness & belt

FEATURES

- Molle inside to fit 130cm long equipment or components from bigger pieces
- Detachable harness and belt
- Loops to fit straps for insertion by parachute

Full Mission Pack System

Crusader EC (extended capacity) is another smart derivate from the Crusader family with several unique functions. Any type of man portable radio equipment can be stowed in the wide envelope at the center of the back. The radio can easily be operated without having to open the rucsac itself. FMPS delivers the flexibility to carry a variety of radio equipment and batteries without sacrificing space for (individual) combat equipment. Additional pockets for antenna's and a "mil spec" laptop are making Crusader EC extremely suitable for any comms job !

Crusader EC is not just about radio equipment. The envelope can be changed quickly into a compartment in which odd size equipment can be stowed. Anything like heavy weapons, grenades, .50 inch ammo boxes, large volume cans for water, ski-boots, tents etc. can be stowed in the envelope. Heavy weapon operators love Crusader EC to bits ! The rigid Cyclops system nicely transfers the load on the hips and protects the back from typical military equipment pressing through. Crusader EC is an incredible solution to transport equipment man packed.

FMPS CRUSADER EC LV00052-2 LV00052-3 LV00052-4

GB

The Crusader EC, the work horse from the forces. This pack holds every piece of combat equipment a soldier on foot may need. Placed in the envelope at the center of the back a radio can be operated without having to open or unpack the rucksack itself. The complete original pack volume from Crusader (90+20 ltr.) remains available to stow individual equipment.

FEATURES

- Cyclops II back system
- Envelope to stow and operate radio equipment or to hold heavy odd size equipment like ammo boxes, grenades, heavy weapons, tent, water can, ski boots etc.
- Other features same as Crusader

Berghaus Medic Pack System

BMPS has been developed to carry medic equipment from an individual up to dedicated medic staff, assigned to operational units. BMPS was created after intensive contacts with medic experts. Requirements from the medics based on experience in combat and Berghaus as a high end rucksack supplier, formed a unique blend which has led to a modular solution of carrying medic equipment. BMPS packs have been extensively tested and proven in the world's toughest environments.

BMPS FIRST AID KIT (FAK) LV00058-xxx**GB**

BMPS FAK holds and protects your individual medic equipment in an organized and oversee able manner.

BHDD GLADIUS 140 WHEEL LV00055-xxx

GB

Gladius 140 has an end grab handle and grab handles on the sides to put the duffel in or pull out of the trunk of a car. The bottom is made from reinforced PU honey comb board. With its rugged looks and ultra-durable fabric, the Gladius 140 is a great wheeled heavy duty duffel to comfortably transport massive loads.

FEATURES

- End grab handle and wheels
- Large end pocket with soft wall split lining to segregate sharp objects
- Tie-on points that convert to rucksack straps
- Lockable zip sliders
- Two top compression straps
- Daisy chains
- Foam mat inside
- Internal light grey colored mesh pockets on all sides and below the top flap
- Bottom can be folded for easy storage
- Internal fold away frame to support upright standing

FABRICS

ARMADURA 70 D

A high density ripstop using highly packed 70 D fine yarns for low weight. A combination of DWR treatment on the face and a 4 x PU coating applied to the reverse gives high waterproofness.

ARMADURA 210 D HD RS

An ultra lightweight 210 denier high density nylon ripstop woven fabric, delivering fantastic tear strength and durability.

ARMADURA 1000 D

A 1000 denier texturised nylon used for its very high tear strength and abrasion resistance.

GORE-TEX®

GORE-TEX® is designed to provide breathable comfort and durably waterproof and windproof protection. GORE-TEX® is ideal for a wide range of outdoor activities. The secret of GORE-TEX® fabrics lies within its revolutionary membrane. The expanded PTFE portion of the membrane contains over 9 billion microscopic pores per square inch. These pores are approximately 20,000 times smaller than a drop of water, but 700 times bigger than a molecule of moisture vapour. So whilst water droplets cannot penetrate the GORE-TEX® membrane, moisture vapour (a gas) can easily escape.

Perfected through intensive research and development, PERTEX® Microlight has become the global standard for lightweight outdoor gear. Highly abrasion resistant, soft, downproof, windproof and having a durable water repellency, PERTEX® Microlight contains a well-balanced list of features, making it ideal for all your mountain adventures.

PrimaLoft® PL1 Fill

A unique Microfibre insulation which resembles the physical and thermal properties of down. PRIMALOFT® insulation is lightweight and compressible and is unsurpassed in its ability to keep you drier and warmer than down and other synthetics.

WINDSTOPPER® Soft Shell

WINDSTOPPER® Soft Shell offers total windproofness and maximum breathability, combining the comfort of a soft mid-layer and the water resistance of a shell in one garment. WINDSTOPPER® Soft Shell keeps you comfortable with the freedom of movement you need for enhanced performance in a wide range of activities and weather conditions.
